Cows and Goats

We have Jersey cows and Alpine, Saanen, and La Mancha goats. We pasture feed our herd and supplement them with kelp, non-gmo alfalfa hay and grain to keep them still while we milk them. Goats are fed goat minerals

Milk

We sell in milk in one gallon plastic jugs too. Milk will last week or more if it is properly stored. Cow milk separates and the cream floats to the top. Skim it off or mix it in. Goat milk cream doesn't separate.
